

Summer Holidays Study for Environmental Science.

Environmental Science is the study of the world and all that is happening to the natural systems of the planet, both living and non-living. Your task for over the holidays is to familiarise yourself with the state of the environment.

Task 1.

Find Nature or Environmental documentaries. For example...

- Documentaries by David Attenborough
- Documentaries on Netflix, such as A Plastic Ocean – beware that some such as Cowspiracy might be a bit grim in places.
- Or type Environment into you tube.

Write a summary of your findings, thinking about impacts and responses.

Documentary 1:

<u>Brief overview</u>	
<u>Short and long term impacts</u>	<u>Responses</u>

Documentary 2:

<u>Brief overview</u>

<u>Short and long term impacts</u>	<u>Responses</u>

Task 2.

During the summer, look around for examples of environmental impacts – positive and negative – e.g, plastic on the beach, pollution or rubbish, eco friendly things, solar power stations, etc. Take some pictures on your phone and make a collage of photos representing the environment of your summer.

Task 3.

Find an article on the internet or in a paper/magazine about the environment – summarise the article in 5 key points.

Article name:

Author and date of publish:

Summary points:

1.
.....
2.
.....
3.
.....
4.
.....
5.
.....
.....

Bring in during your first lesson to share with the class.
