What will you have learnt by the end of TERM 2?

The National Curriculum programme of study states that students should ***"know how art and design both reflect and shape our history, and contribute to the culture, creativity and wealth of our nation."***

Students will learn about colour psychology in design and how companies use these in branding. They will learn about logos and logo systems, how colour is used within these and develop their own ideas to respond to a given brief to design a logo for a company of their choice. Students will learn how to research, analyse and respond to sources materials, gathering resources appropriate to their intentions and learn how to use different types of sketches for different purposes.

Students will use basic design sketches to develop and refine their proposals and use annotations to explain their thought processes clearly. They will develop one final logo in response to the brief and extend their learning by considering the concept of a logo system to adapt their final logo based upon a theme, cause or specific target market of their choice.

The Subjects

At KS3, students will study one "Art and Design" lesson once per week. Art and Design modules will include fine art, graphics and art. craft and design schemes of learning with a view to introduce students to a broad variety of visual literacy skills and knowledge. Term 2 will focus on graphics.

Assessment

As all subjects within the Art, Design and Technology faculty are predominantly practical, assessment and verbal feedback is an essential aspect of most lessons- this may be teacher led, peer or self-assessment.

At the end of each module, each student will be given grades based upon the work they have completed in addition to an Attitude to Learning grade.
