

THE DUSTON TDs 4-19 Knowledge itself is power SCHOOL

A Level Psychology Y11-Y12 Summer Work

Name:

Psychology

Year 11 – Year 12 Summer Work

Conduct your own research into **five studies** in psychology.

You need to complete a summary page on each of these studies from the following topics.

Then choose one of those studies to complete the questions on the final page.

Topic	Study
Social Influence	Moscovici et al. (1969) - Blue-Green Study
Memory	Johnson and Scott (1976) - Weapons focus
Attachment	Lorenz (1952) - Imprinting in geese
Approaches in Psychology	Bandura (1961) - Bobo doll study
Clinical Psychology and Mental Health	Watson and Rayner (1920) - experiment on Little Albert

You may use the summary pages on the next few pages to summarise the studies or do this in another way. You will need to show us your research during the first lesson in Year 12.

If you have any questions regarding this summer work, please contact tclarke@thedustonschool.org

Strengths and weaknesses of the research

Choose one of the studies you have researched.

Explain how the findings from this study can be used in the real world to improve society or individual people's lives.

If you were to repeat this study, detail two ways you would improve the methods used.

If you were to conduct a study to investigate this topic further, how would you do it?
